

Professional twocomponent varnish system (spray application)

August 2018

Products: Epifanes PP Varnish Extra + Epifanes PU Speedcoat Clear Gloss

General surface preparation of neutral wood types, i.e. mahogany, meranti, Oregon pine

Make sure that the wood is dry and thoroughly degreased. Moisture content must be between 12 - 17%. Wipe down wood with Epifanes Thinner for PP varnish Extra, acetone or other aggressive degreaser and allow to evaporate. Use multiple (paper) towels and turn them regularly.

If needed, first sand the wood to a fresh surface using dry abrasive paper P60-80. Subsequently sand with finer grits from P100 towards P220 dry. Always sand along the wood grain. Remove all sanding dust and degrease once more. Allow to fully evaporate before applying varnish.

General surface preparation of tropical wood type, i.e. teak and iroco

Tropical wood contains natural acids that may cause adhesion problems. A thorough surface preparation may overcome this. Clean and degrease tropical wood with ample amounts of Epifanes Thinner for PP varnish Extra, acetone or other aggressive degreaser and allow to evaporate. Use multiple (paper) towels and turn them regularly. Do not use water! This may activate the wood acids.

If needed, first sand the wood to a fresh surface using dry abrasive paper P60-80. Subsequently sand with finer grits from P100 toward P180 dry. Always sand along the wood grain. Remove all sanding dust and degrease once more. Allow to fully evaporate before applying varnish

This varnish system is sprayable by HLVP and RP spray guns. For finest spray results application by RP is advised. **Spray settings at 20°C.**:

	Epifanes PP Varnish Extra	Epifanes PU Speedcoat			
Thinner	Thinner for PP Varnish Extra	Thinner for PU Speedcoat			
Thinning ratio	20-25%	15-25%			
Pressure on nozzle	2.0 – 2.5 bar	2.2 bar			
Nozzle	1.1 – 1.6 mm				
Viscosity DIN-cup 4	17 ± 2 seconds	18 – 20 seconds			

Professional twocomponent varnish system (spray application)

Coat #	Product	Thinning %	Filmthickness		Brush/spray	Recoatability in hours			Sandable		
			wet	dry		12°C.	20°C.	28°C.			
1.*	PP Vernis Extra	50%	70-90μm	15-20μm	brush	4	3	2	24 hours		
2.*	PP Vernis Extra	25%	70-90μm	20-30μm	brush	4	3	2	24 hours		
3.*	PP Vernis Extra	10%	70-90μm	25-35μm	brush	4	3	2	24 hours		
After 3 coats, allow 48 hours to cure. After 48 hours, sand with P280											
4.	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
5.	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
6.	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
After 6 coats, allow 48 hours to cure. After 48 hours, sand with P320											
7.	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
8.	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
9.	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
After 9 coats, allow 48 hours to cure. After 48 hours, sand with P320											
10.**	PP Vernis Extra	20-25%	70-90μm	35-45µm	Spray	3	2	1	24 hours		
11.**	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
12.**	PP Vernis Extra	20-25%	70-90μm	35-45μm	Spray	3	2	1	24 hours		
After 12 coats, allow 48 hours to cure. After 48 hours, sand with P320											
13.	PU Speedcoat	15-25%	70-90μm	35-45μm	Spray	2	1	0,5	24 hours		
14.	PU Speedcoat	15-25%	70-90μm	35-45μm	Spray	2	1	0,5	24 hours		
15.***	PU Speedcoat	15-25%	70-90μm	35-45μm	Spray	2	1	0,5	24 hours		

Remarks on system build up:

- * Apply building coats # 1 3 by longhaired soft brush. Brush application will avoid cratering caused by trapped air in the wood pockets To minimize sinking of the varnish system, allow each 3rd. coat 48 hours to cure. After 48 hours, sand with P320.
- ** Total dry filmthickness of building coats # 1-9 must be at least 400µm. Depending on type of wood, saw cut and (open) wood structure more building coats of PP Varnish Extra may be necessary. See coats # 10-12.
- *** Allow the whole system 48 hours to cure. For longer gloss retention, more coats PU Speedcoat may be applied. **Note:** For a good condition of the varnish system, do not replace building coats of PP Varnish Extra by coats of PU Speedcoat. Polishable after 7 days curing time (20°C.).
